

CTS1851 Final Project

On-line Catalog Web Site

You develop an On-line Catalog for a wholesale or a retail business. **You must type code by yourself, don't use any template created by other people, you must do it by yourself. You only use HTML and CSS, not any other languages.**

Language used: HTML 5 and CSS 3. (5 points)

1. Create ten html pages at least. (20 points)
2. The pages can be viewed on PC, cell phone, and different devices. (5 points)
3. Every page should have same layout, create an external CSS to set up the layout and styles. (5 points)
4. Every page should have same header, links, and footer. (5 points)
5. Use JavaScript modernizer file to make these pages available on old browsers. (5 points)
6. Put a least 6 items on the catalog, each item should have a thumbnail picture and large size picture (25 points)
7. Thumbnail picture is a link to detail page, detail page should have a large size picture with description, item number or name, unit price, etc. (30 points)

Add a hyperlink on your web site's home page to point to your Final Project. Submit the zipped Final Project to Dropbox.
